

# SecureFort User Guide

Welcome to SecureFort! This guide provides step-by-step instructions for setting up your device to connect to the Internet and VPN services. Follow these steps carefully to ensure a smooth and secure experience.

---

## 1. Access the SecureFort Web Interface

1. Launch a web browser on your computer or mobile device.
  2. Enter the following URL into the browser's address bar:
  3. `http://192.168.3.1`
  4. Press **Enter** to load the SecureFort login page.
- 

## 2. Login to SecureFort

1. On the login page, enter the administrator password:
    - **Username:** `admin`
    - **Password:** [Your "admin" password]
  2. Click the **Submit** button to access the SecureFort dashboard.
- 

## 3. Navigation Menu Overview

The SecureFort web interface has the following navigation menu options:

- **Dashboard:** Displays network activity and connection statistics.
  - **Connect:** Configure and establish an Internet connection.
  - **VPN:** Manage VPN services.
  - **System:** System settings and maintenance options.
  - **Logout:** Log out of the SecureFort interface.
- 

## 4. Establishing an Internet Connection

### 4.1 Access the Connection Settings

1. In the navigation menu, click **Connect**.

2. From the dropdown menu labeled **External Interface**, select your connection type:
  - **Wired** (Ethernet)
  - **Wireless** (Wi-Fi)
3. Click **Submit** to proceed.

## 4.2 Connecting to a Wireless Network

1. From the list of available Wi-Fi networks in the dropdown box, select the desired Wi-Fi service.
    - **Open Network:** If you choose an open Wi-Fi network:
      - Click the **Captive Portal** button to complete the connection.
    - **Secured Network:** If the network requires a password:
      - Enter the Wi-Fi credentials (SSID and password).
      - Click **Select** to connect.
- 

## 5. Configuring VPN Services

1. Once your Internet connection is established, navigate to the **VPN** page.
  2. From the dropdown box, select a VPN service option:
    - **Available VPN Services:** Choose a service from the pre-configured list.
    - **Terminate VPN:** Disconnect the current VPN connection.
    - **Skip VPN:** Proceed without enabling a VPN.
  3. To provision a new VPN service:
    - Upload your VPN profile file using the upload option on the page.
    - Select the uploaded VPN service from the list.
  4. Click the **Submit** button to apply the VPN configuration.
- 

## 6. Dashboard Overview

- The **Dashboard** page displays real-time statistics of active connections in your Wireless Local Area Network (WLAN).
  - The connection activity chart refreshes automatically every 5 seconds.
- 

## 7. Logging Out

1. When finished, click **Logout** in the navigation menu to securely exit the SecureFort interface.
-

Thank you for using SecureFort! If you encounter any issues, please consult the support documentation or contact customer service for assistance.
